Subject: Need change to an old site

Charlotte,

I found a site which had an SI done in 1990 and was coded in CERCLIS as having "low" priority for further investigation. I had assigned it to the State to do a reassessment. Upon conducting the file review, it became apparent that the site was NFRAP'd in 1990 (score of 5), but it was incorrectly coded into CERCLIS and was not NFRAP'd in CERCLIS.

Due to accomplishment lockout, I cannot change the SI accomplishment date to NFRAP 2/28/90 as it is marked on the report in the file. Can you do this? And will it automatically change the Non-NPL Status screen to show NFRAP 2/28/90? While you're in there, would you check the non-NPL status screen to make sure it reads that?

The site is named Colonial Printing Ink Co., GAD094066859.

Please let me know what the resolution is....

Thanks!
